**DEVELOPMENT OF AN UNBORN CHILD**

Week 27- My nervous system is continuing to develop so I can breath and swallow better. It also helps keep my body at the right temperature so I won't get too hot or too cold.  
 Week 28 - I now weigh about two pounds and am about 12-13 inches long.  
 Week 29 (about seven months) - Not so long ago, my brain was flat and smooth, but now it has grown lots of grooves. Different parts of my brain are getting more and more specialized, so they can help me better to hear, to see, to smell and to keep my balance when I someday learn to walk.
